CAREER OBJECTIVE

Motivated Computer Science Engineering student (2026 graduate) with a strong interest in Java Full Stack Development. I am currently developing skills in Core Java, SQL, Web Development, and Spring Boot. Seeking an entry-level Software Developer / Java Developer role where I can apply programming knowledge, contribute to real-world projects, and continuously learn modern technologies.

TECHNICAL SKILLS

- Programming: Java (Core Java), SQL, JavaScript (Basic)
- Frontend: HTML5, CSS3, JavaScript, React (Learning)
- Backend: Spring Boot (Learning), REST API (Basics), JDBC
- Database: MySQL
- Tools: Git, GitHub, VS Code, Eclipse, IntelliJ IDEA
- Concepts: OOP, Exception Handling, Collections, DBMS Fundamentals

EDUCATION

Bachelor of Engineering – Computer Science
Expected Graduation: 2026
CGPA: 6.4

PROJECTS

Full Stack Web Application (In Progress)

Developing a web application using Java, Spring Boot, React, and MySQL to practice full stack development.

- Implementing REST APIs for communication between frontend and backend
- Integrating MySQL database with backend services
- Building responsive UI components using React
- Practicing Git version control and project structuring

Student Management System (Java Console Project)

- Developed a console-based application using Core Java
- Implemented CRUD operations for managing student records
- Connected Java application with MySQL database using JDBC
- Applied Object-Oriented Programming concepts

CERTIFICATIONS

- Java Full Stack Development – Udemy (In Progress)
- Core Java Programming – Online Course
